```java
public class ProductHandler {

    private List<Product> productList = new ArrayList<>();
    DbManager<Category> DbHandler = new DbManager<>();
    Product product = new Product(name:"", code:0, pqr:0, description:"", provider:"");

    private void updateProduct() {
        productList = product.getProducts();
    }

    public List<Product> getProductList() {
        updateProduct();
        return productList;
    }

}
```
