Rubric

GitHub	/100
Defense	/100
1. Presentation	8.11/10
2. Interview	2/5

- This grade was mainly given because, in the online meeting, the participants can be heard but only one person is visible on camera (-3).

3. Project Definition 4.7/5

- When reviewing I saw that it did not specify more detailed technical information, for example what type of programming language they were going to use in the project. (-0.2)
- In several parts it extends too much and there was no brief explanation (-0.1)

4. IEEE 830 9.4/10

- In some parts of the document I noticed that better words could be used so that the idea is expressed a little better. (-0.1)
- The acronym "DSMS" should be "DMS" which stands for "Discount Management System" (-0.1)

5. UML 6/10

a. Use Case Diagram

- The reason for this grade was because there is a lack of functionality (-2), in addition, the finance report functionality is not a verb (-1) and the title of the system is inconsistent (-1).

b. Class Diagram 7/10

- Wrong camelcase, plural in some methods, missing functionality (for each one -1).

6. Test Cases 25/10

- Test Cases have 25

7. Code Quality 6/10

- More than 3 packages (-0.5)
- In the "Category" class there is an empty function without any type of return data (-0.1)
- Bad name for functions, they don't have to be plural (-0.4)
- Bad indentations in the code (-1)
- Unclear or misspelled names

1.1 isCashPayment

The isCashPayment attribute could be better named to express it with a much clearer purpose, for example isPaymentInCash.

1.2 Ammount

The name ammount is misspelled, it should be amount.

1.3 Transaction

The transaction variable is a list of transactions within the Transaction class, so it can be confusing because it has the same name as the class. Therefore, it should be named more descriptively. For example: allTransactions.

8. Validation 10/10

- Everything seems to be in order

9. Verification 10/20

- E1. During my testing process on the user search function to make a sale, I encountered an error that resulted in an `IndexOutOfBoundsException`. This issue occurs after trying several unsuccessful searches and selecting the "Back" option from the menu, also in the process of creating a new sale, I found an error in the apply discount functionality.
- E2. When selecting a product, edit a product; We enter the name of
