WORKSHOP #:16

1. David Gustavo Cepeda Salguero

```
package ec.edu.espe.child.view;

import com.google.gson.Gson;
import ec.edu.espe.child.model.Child;

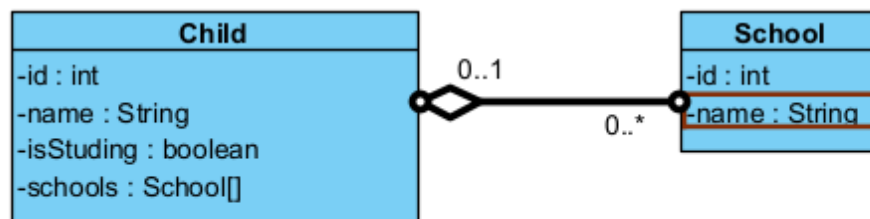

/**
 * @author David
 */
public class ChildSystemView {

    public static void main(String[] args) {
        String jsonString = "{\"id\":1,\"name\":\"David\",\"schools\":{\"id\":1,\"name\":\"Montufar\"},{\"id\":2,\"name\":\"JEMoreno\"}}";
        Gson gson = new Gson();
        Child children = gson.fromJson(jsonString, Child.class);
        System.out.println("Child --> " + children.toString());
    }
}
```

Output - Child (run)

```
run:
Child --> Child (id=1, name=David, isStuding=false, schools=[Schools(id=1, name=Montufar), Schools(id=2, name=JEMoreno)])
BUILD SUCCESSFUL (total time: 0 seconds)
```
