## Security Quickstart

To access data stored in Atlas, you'll need to create users and set up network security controls. [Learn more about security setup.](#)

1

How would you like to authenticate your connection?

Your first user will have permission to read and write any data in your project.

Username and Password

Certificate

We autogenerated a username and password for your first database user in this project using your MongoDB Cloud registration information.

Create a database user using a username and password. Users will be given the *read and write to any database privilege* by default. You can update these permissions and/or create additional users later. Ensure these credentials are different to your MongoDB Cloud username and password.

Create User

2

Where would you like to connect from?

Enable access for any network(s) that need to read and write data to your cluster.

ADVANCED
