Overview

Cluster0

Database Deployment

Connect to Cluster0

1 Set up connection security

2 Choose a connection method

3 Connect

You need to secure your MongoDB Atlas cluster before you can use it. Set which users and IP addresses can access your cluster now. [Read more](#)

1. Add a connection IP address

✓ Your current IP address (192.188.58.17) has been added to enable local connectivity.

2. Create a database user

This first user will have [atlasAdmin](#) permissions for this project. You'll need your database user's credentials in the next step.

We autogenerated a username and password. You can use this or create your own.
